

# LANCE<sup>®</sup> Introduces a new ruler

## The PGS-1-LAN Pattern Grading Scale

**Pattern shifting** is the process of increasing/decreasing the overall dimensions of a pattern by moving it a measured distance up and down / left and right, using a specially designed ruler (PGS-1-LAN) to redraw the outline, while the same results as the cut-and-spread method, the PGS-1-LAN allows for modification.

\* 1 mm thick clear plastic
