

Turntable Manual Spreader

The Turntable is a lightweight easy-to-use spreader. When positioned at the end of a cutting table, the material is manually spread across the table. The maneuverable spreader adjusts for face-up-one way, face-to-face-nap-one-way and face-to-face spreading. To improve efficiency when spreading face-up-one way, a guided Long-Handled Chickadee rotary shear (not attached) can be added to end cut each ply with perfect accuracy.

Standard Features

- Manual Edge Control
- 1.25 in. (3.175 cm) Frozen Cloth Bar with Cones
- Table must be 6 inches (15.2 cm) wider than Turntable
