

ETON  SYSTEMS

*Above and beyond*

**OPTA**

# ETON SYSTEM TO HONOR OUR ROOTS

In 1967, Inge Davidsson founded Eton Systems. Davidsson's conveyor design provided great benefits for garment manufacturers around the world. We have gathered knowledge and experience in the garment industry for more than 50 years. We know textile production and Eton Systems have had a great impact on productivity in thousands of production lines. **Opta is designed to provide maximum value to our garment customers. Opta is a modern and highly customizable version of the Eton System. Our goal was to create a system containing all the features garment production needs. Opta optimizes productivity and gives the tools for competitive advantage – now and in the future!**

# DESIGNING THE UNIT PRODUCTION SYSTEM

The Garment industry has traditionally used a bundle method in production. The way Inge Davidsson and Eton Systems revolutionized the industry was to keep all pieces for a single garment in the same product carrier. The Unit Production System was born. UPS and **Opta** will reduce your work in progress from days to hours. Allowing increased control of production flow. Enabling faster and more accurate delivery times.

**Opta** will make your production less exposed to external circumstances. Changes in labor cost and shortage of skilled labor will not affect your business to the same extent. Producing garments will become an easier task with the standardized methods obtained with a UPS. **Opta Systems** competitive advantage lies in an ability to rapidly adjust production to special customer order, without disrupting production flow. Caught your interest?

# OPTA SYSTEM – DESIGNED FOR THE GARMENT INDUSTRY

**KEEPING THE NEEDLE MOVING** – With RFID identified product carriers arriving at your workstation you will never run out of material. Giving you optimal utilization of time. This is what operators will see. Additional benefit to Opta System is an optimal and ergonomic working position. Opta system will assure operators conditions for increased efficiency

## **MAXIMIZED VALUE FOR YOUR INVESTMENT**

The Eton Systems has evolved to fit almost any kind of production. With Opta, we have a system containing all the features your business needed for increased production. A Garment production faces different challenges from other industries, and with the optimized Eton System ensuring maximized value for garment production.

## **ELIMINATE MANUAL HANDLING**

By automating material handling the Opta System creates time to add value to your product. With less manual handling, there's more time to keep the needle moving. The Opta System practically eliminates the need for material handling. Time usually spent on handling bundles of materials can be focused on producing garments.

## **REAL-TIME DATA**

An Eton System is more than hardware. The software gives you perfect oversight and control of every piece of garment throughout value-adding chain. Eton Systems software highlights performance and bottlenecks in production. Simple quick commands at the loading station allows adjustment to the workflow and optimize productivity.

## **REDUCE THROUGHPUT TIME DRAMATICALLY AND SHORTEN LEAD TIMES**

We cannot give you more hours to your day, but the Opta system ensures that you are able to utilize every minute for value-adding processes. All Opta users will experience reduced throughput time, and in turn shorten lead times to your customers.

## **ONE SIZE NEVER FITS ALL**

We know that production requirements change and no two facilities look alike. Therefore, production systems not only needs to fit requirements today, but in the future as well. Modular design has always been a tell-tale sign of Eton Systems. Opta System has the ability and flexibility to fit in any factory.

## **DESIGNED FOR GROWTH AND FLEXIBILITY**

Opta is designed to be flexible. Allowing rapid changes and expansions to your conveyor system. We all want to be able to increase production capacity when the demand increases. Bridges and buffers allows extensions to the system in the future. Eton System is a smart investment providing reliability and customization to garment production.

## ETON SYSTEMS ABOVE AND BEYOND

Eton Systems engineers and technicians have extensive experience in the Garment industry. We have delivered thousands of overhead conveyor systems to the industry for more than 50 years. Our systems has evolved time and again to meet demands from ever changing industry. **Innovation is in our DNA.** Therefore, we are confident that our new **Opta System** is a perfect investment for your Garment production. Now and in the future!
