Why Detoxify with Aqua Chi Ionic Foot Bath?

In today's world it is estimated that over 95% of people in our modern society experience a chemical imbalance within their bodies which causes an excess of hydrogen ions, and their blood pH is lower than optimal (7.45 pH). These people will greatly benefit from exposure to high concentrations of negatively charged ions.

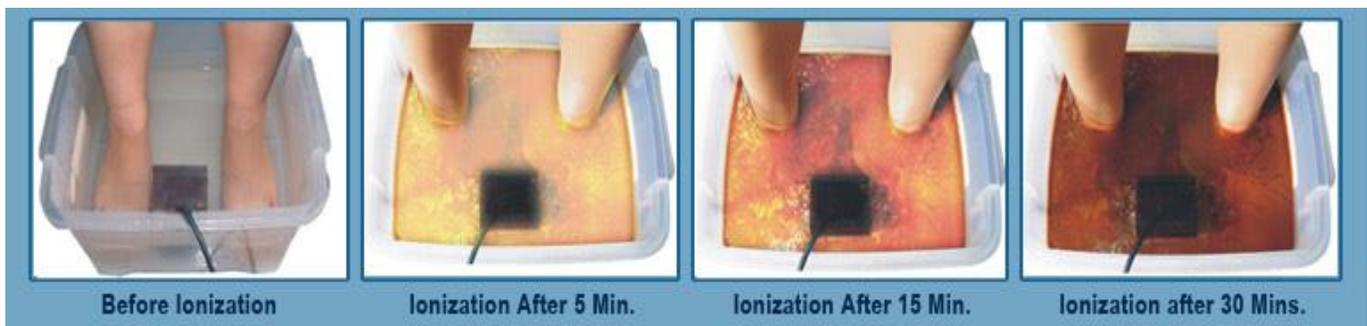

The way ionization works is a water molecule is composed of two hydrogen atoms and one oxygen atom. When the molecule loses a hydrogen atom, the remaining OH molecule takes on a negative charge. As you walk along the beach your body absorbs millions of these negatively charged ions, which alkalize the blood and tissue. Because of poor diet and high stress, we tend to accumulate and store excessive quantities of waste products, such as diabetic, lactic, pyruvic, uric, carbonic, acetic, butyric, and hepatic acids.

This process has been known to:

- *Remove toxins and body waste products known to cause health problems
 - *Chelate heavy metals
 - *Inactivate viruses, bacteria, yeast and fungus
 - *Relieve pain and tension including headaches
 - *Purify the blood and lymph nodes
 - *Stimulate and balance the immune system
 - *Enhance nutrient absorption
- *Reduce inflammation and unwanted fluid retention
 - *Help clear up bad skin
 - *Assist in weight loss
- *Slow down aging and improve body flexibility
- *Quicken recovery time from disease or injury
 - *Increase oxygen in the body
- *Rejuvenate and energize your whole body
 - *Improve sleep
