## GUITAR LESSONS FOR EVERY TASTE

There is a lot of variety within the instrument, but our instructors can teach you any kind of guitar that you want to learn. We offer lessons in all genres of music on three popular types of guitars:

### **Acoustic– Electric Guitar – Bass Guitar**

Whether you want to learn to play jazz on an acoustic guitar or the bassline of a rock song on a bass guitar, we have instructors that can help you out. Our lessons are focused on your needs and what you want to play, so all you have to do is tell us and we will help you work out a fun way to learn.

With our lessons, you never have to learn a bunch of boring songs from an overstretched group instructor. Our instructors will be focused on you and are always willing to tailor the lesson plan for you. You also don't have to worry about missing lessons if you get busy, because we are flexible and happy to reschedule if needed. Our guitar lessons will fit right into your life without requiring you to add another thing to juggle.

### **FROM BEGINNERS TO PERFORMERS: WE TEACH ALL SKILL LEVELS**

It doesn't matter whether you are just starting out or have been playing for years. We have fun, professional instructors for beginners and seasoned players. Our students may want a refresher or tips on an instrument that they have played for years, or they may have never strummed a guitar before in their life. Either way is okay!

Beginning students will learn guitar from the ground up, including scales, chords, proper fingering and reading music. This allows our students to have fun learning easy songs while building a solid foundation for advanced training if they wish to continue. There are no dictatorial, autocratic lessons from Bold Music—we believe that the best way to learn guitar is to have fun playing while building your skills. Fun keeps students motivated and engaged, plus it actually improves learning.

### **PRACTICE MAKES PERFECT (AND IMPROVES YOUR GUITAR PLAYING!)**

Practicing is the backbone of learning an instrument. Our instructors will teach you new techniques and walk you through the steps to learning to play the guitar (or learning to be a better guitar player), but there are some very good reasons that you need to practice if you plan to improve. Plus, it's just fun!

No one ever became a skilled musician by only attending lessons. This is because practice teaches you some very important skills that help you grow as a musician. Playing the guitar requires a certain amount of muscle memory, which is only obtained by practice. Just like learning to write, your hand needs practice in order to be able to make steady movements in the right place. Skills like reading music and memorizing fingering positions for chords are also greatly enhanced by regular practice. The more you do it, the better you will be!
