

The Multi-Roll Carousel system, available in many sizes and styles, provides tremendously simple access to multiple material rolls for end-of-table spreading, using minimal floor space. With the press of a button, material rolls turn around the carousel, stopping on the desired roll.

- Easy mobility with motorized control
- Simplified roll loading right off the floor or cart
- Shielded motors prevent materials from being soiled
- Dual controls for loading and operating ease
- Single tower, multiple tower or overhead configurations available
- Casters and track configuration
- Material can feed from either side
