L135 Laser System

Eastman®

Sealed edges and extreme precision.

Eastman's gas assist, class 4 laser cuts and seals material edge simultaneously with unmatched precision. Make detailed cuts without physical contact, reducing defects from wrinkling and pulling. The L135 is capable of moving at speeds ranging from 1/2 inches per second up to 30 inches per second, depending on the thickness of the textile. Various laser wattage configurations are available: 50, 60, 80, 100, or 120 watts. The ceramic core is durable and provides optimal laser stability while cutting, engraving, or perforating.

The standard cutting surface options include galvanized steel, steel honeycomb, or wire mesh. All options easily slide in place over the cutting tabletop. A supplemental table surface is supplied as a roll-down for use when cutting with traditional blades.

International Compliance Ratings

The operating computer and control cabinet are housed in an ergonomic enclosure that can be sealed to offer dust and water-resistant protection in harsh or high particulate environments. Additionally, cabling connectors, servo motors and display components meet recognized international protection ratings requirements.

Buffalo, NY 14203

Available in a range of widths, lengths and various tool head accessory options, the cutting table with a low-watt laser will be built to match your application needs. Customize tools and capabilities to maximize your productivity.

Interchange Laser and Traditional Cutting

The L135 laser mounts to the gantry of a static or conveyor table, allowing a quick transition from traditional cutting to laser cutting. Marking and labeling tools, or any other tool head options, can be added.

Material Hold-Down

The cutting table is equipped with a high-flow vacuum system to ensure optimum material hold-down for cutting. The surface ensures evenly dispersed vacuum flow, no matter where you are cutting. Cutting zones may be designated so that cutting occurs in one area while piece removal takes place in another.

Industrial Design for Rigorous Use

- Advanced electro-pneumatic regulator for precise tool pressure control
- Heavy-duty cable connectors
- Easy access, sealed doors for inspection and maintenance
- Heavy-gauge steel construction with scratchresistant powder coated finish

Eastman®

Safety

- Gantry-mounted, laser enabled indicator light
- Four remote emergency stops: two on cutting gantry, two system-mounted
- Additional gantry-mounted stop disks pause system operation until returned to neutral and reset. Operation can then be resumed from any position
- Multiple fume extraction options available to capture hazardous fumes and particulates at the source
- Key switch activated for laser lockout/tagout, safeguards employees from unexpected start-up

Additional Options		
2 in. (50.8mm) laser lens	Test burn cards	
Brass tip laser nozzle	Spare laser optics kit	
Lens removal tool	Fume extraction pre-filter	
Lens cleaning tissue	Fume extraction hepa-filter	
3 in. (76.2mm) dust connection hose	Fume extraction carbon-filter	
Signal Indicators		
Green: system idle	Red: laser actively firing	
	Red/Yellow Flashing: laser fault	

Hazardous Material

Do not cut flammable material or any material emitting toxic fumes when cut with the laser. See Material Cut/Do Not Cut list.

LASER SPECIFICATIONS		ENGLISH	METRIC
aser Type		CO ₂ Ceramic Core	IVIETRIC
Laser Type Laser Class		Class 4	
Beam Diameter		0.098 in.	2.5mm
Beam Diameter (at cutting surface)		0.076 in.	0.343mm
		10.6 µm	0.34311111
Wavelength Laser Cooling		Air	
Laser Cooling Laser Watts		50, 60, 80, 100, 120 watt configurations	
Laser Watts Focal Distance		2.5 in. 63.5mm	
		+/- 0.079 in.	+/- 2mm
Focus Tolerance Range			
Fume Extraction		Above table: 266 cfm, required 3in. (76.2mm felx hose). Below table: 266 cfm	
Gas Assist		N2 recommended, CO ₂ acceptable	
Laser Recharge		Not required	
Laser Lockout		Key switch
