

# New and Improved Packaging for the Wilson USA Knives!

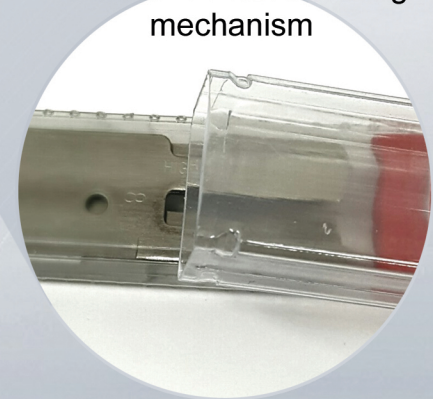

In a continuous effort to improve the packaging of their knives, Wilson USA has changed to a “New” telescoping tube. This packaging makes handling the Wilson knives much safer. It also makes stacking and shelving easier. Currently all of our 8” and 10” Wilson knives are in the “New” packaging. Changes on all other sizes should take place in the near future.

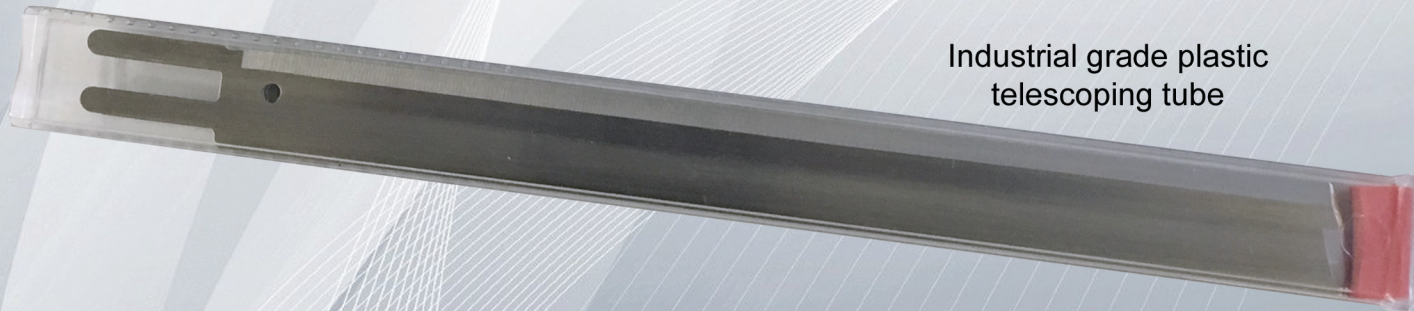

Color insert specifically designed to protect the knife tips and keep them “factory sharp”

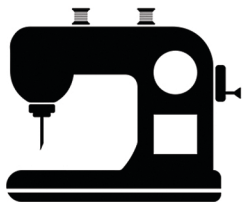

Molded notch in plastic tubing ensures a secure locking mechanism

Industrial grade plastic telescoping tube

Don't settle for anything less than the original
