

# These three quick steps will keep your sewing and embroidery machines working like new.

**NEW!! Alba Wash Hook Cleaner/Lubricant removes dirt, grime, fibers and adhesive from hooks and knives on your sewing and embroidery machines.** Our latest product is used to clean the hook and knife while still mounted on the machine. The hook and knife accumulate dirt, threads, fibers and adhesives which cause the hook to break threads and slow down production. **Alba Wash** cleans off the hook, knife and the housing so that the threads flow smoothly. **Alba Wash** can also be used on industrial and home sewing machines.

**Individually sold  
(12) cans per case**

## 1 ALB1615 - Hook Cleaner/Lubricant

A combination solvent cleaner and mineral oil based solution. It allows you to thoroughly clean and flush rotary hooks, needle cases other parts/assemblies in your embroidery machinery.

## 2 ALB1340 - Big Shot Duster

Sprays a powerful and clean stream of dry compressed "air" to blast away any remaining dust, dirt and debris. This will dry the cleaned area at the same time.

## 3 ALB1605 - Embroidery Lubricant

The unique metering system sprays one drop of oil each time you depress the button. Using the extension tube, the oil goes exactly where you want it. No excess oil is wasted. No stain causing drips.

### ALB1699-KIT

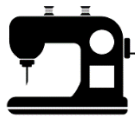

**Minimum (4) kits per order**

View the demonstration in four minutes you'll be

Once your hook, knife and housing are clean, use our **Big Shot** compressed air to dry off the complete area. **Alba Wash** will leave a light layer of lubrication once the area is dry. You'll also want to use **Big Shot** to clean off electronic boards of your embroidery machine or industrial sewing machine. Home sewers like it too. Finish the process with **ALBA-5** Lubricant to dispense high quality mineral oil, one drop at a time.
